ASU provides health services to all current students. The University Clinic provides many diagnostic services and appropriate treatments on an episodic outpatient basis. The clinic is not a substitute for a primary care provider, but it can provide service for students who cannot see their private physicians because of time constraints or distance.

There is no charge for examination, diagnosis or consultation services provided by the clinic; however, there may be charges for injections or lab work. Students must pay for medications that are not stocked in the clinic. Students referred off campus for lab work or X-rays will be responsible for the cost.

Note: For student health plan information, contact the Office of Special Events at 325-942-2021 or go online to www.angelo.edu/services/specialevents.
