No fires reported. (Closed)

University Police maintain a log of fires that have occurred in on-campus student housing in accordance with federal regulations (34 CFR §688.49)

The fire log is not a complete list of all fire events that have occurred on ASU property. The following definitions apply to this fire log.

"On-campus student housing" refers only to structures containing residential occupancy for students. The fire log does not include neighborhood centers within student housing developments, campus facilities (administrative, academic, library, student life, or support) where students may overnight on a transient basis, vehicles, locations off ASU property, or outdoor locations of any kind.

"Fire" is defined as "any instance of open flame or other burning in a place not intended to contain the burning or in an uncontrolled manner."
"Fire" does not include controlled burning, even when that event is contrary to policy, such as candles, smoking, or other open flames, when that open flame does not result in property damage.
