ASU Logo Pumpkin Carving Pattern

1. Carve a hole in the top of your pumpkin and clean out the inside.
2. Tape the template to the face of the pumpkin with the pattern in the center.
3. Use a pin or other pointed object to poke holes in the pumpkin along the black edges. Remove the template.
4. Use a knife to cut the pumpkin along the dotted lines you created. Remove the areas that are solid black on the template.
5. Once the pattern has been cut, place a candle inside the pumpkin, light it and enjoy!
