f. Pass rate – Pass rate--For each academic year, the percent of tests passed by candidates who have finished all educator preparation program requirements for coursework; training; and internship, [student teaching,] clinical teaching, or practicum by the end of that academic year. For purposes of determining the pass rate, candidates shall not be excluded because the candidate has not been recommended for certification, has not passed a certification examination, or is not considered a "completer" for purposes of the Higher Education Act or other applicable law. The pass rate is based solely on the examinations required to obtain certification in the field(s) for which the candidate serves his or her internship, [student teaching,] clinical teaching, or practicum. Examinations not required for certification in that field or fields, whether taken before or after admission to an educator preparation program, are not included. The rate reflects a candidate’s success only on the last attempt made on the examination by the end of the academic year in which the candidate finishes the coursework; training; and internship, [student teaching,] clinical teaching, or practicum program requirements, and does not reflect any attempts made after that year. The formula for calculation of pass rate is the number of successful (i.e., passing) last attempts made by candidates who have finished the specified educator preparation program requirements divided by the total number of last attempts made by those candidates.
