Living Learning Community

A one-year program designed to provide our entering freshmen residing on campus with a supportive academic and social environment.

Scholarships

Approximately $125,000 in scholarships are awarded to incoming freshmen and returning students every year.

Department Highlights

- ASU operates the Management, Instruction and Research (MIR) Center on about 6,000 acres near San Angelo. More commonly called the ASU Ranch, it allows students to gain experience in all phases of cattle, sheep and goat production, as well as range and wildlife management. The center also includes the 8,000-square-foot Food Safety and Product Development Laboratory and the Mayer-Rousselot Agriculture Education Training Center.
- Students can compete on our Judging Teams for livestock, meats and wool, as well as agribusiness and meats quiz bowl teams. Each team is competitive in contests throughout the United States.
- San Angelo is home to the largest sheep and goat auction in the United States. The city also hosts the largest cattle auction in Texas.
