Topics include human territoriality, personal space, crowding, environmental stressors, and person-environment perspectives of social interaction and group processes.

Course Overview:

The course will include weekly written assignments over chapter material from the textbook, discussion boards, and a written project that will be created and assembled over the course of the semester culminating in a final paper. Self-motivation and self-initiation are required for successful online learning. Please pay close attention to the assignment due dates.

Course Objectives:

- Learning to apply course material to improve thinking, problem solving, and decisions.

*Course Evaluation Assignment - At some point in the last few weeks of the semester, you will receive an email from austin.hobbs@angelo.edu with the course evaluation. Please do not delete this email, as completing the course evaluation is an assignment for this class. You will need to send me an email after completing the course evaluation giving me one of the questions that you answered from the evaluation – NOT how you answered the question, as your answers are confidential, just one of the questions so that I will know to give you credit for the assignment.*
