Angelo State University
MGMT 3332-040, Data Analytics
Fall 2017
Syllabus

Class Meetings: MW, 3:00 p.m. - 4:15 p.m., RAS 117

Instructor: Dr. Ola Seriki
Phone: 325-486-6599

Office: Rassman 210
E-mail: ola.seriki@angelo.edu

Office Hours: Every class day 12:00 noon - 1:30 p.m. or by appointment

A note on contacting me / e-mail response times:
Please feel free to stop by during office hours; if you need to see me and can’t make office hours, let me know and we can set something else up. Outside of office hours, the best way to contact me is via email. I will work hard to return all emails received during business hours within 24 hours of receiving them (in most cases I will be quicker than that). Emails received on weekends or during holidays will be replied to by the following Monday or the next working day in the case of holidays.

Course Prerequisites: MGMT 2331 (Applied Business Statistics)

Required Materials:
In the first week of October students will need to purchase the Mimic Pro Simulation from Stukent for a section of the course. The cost is $60. Please do not attempt to purchase this software until you are given instructions by the Instructor during the term.

Course Technology:
We will use Microsoft Excel in this class, along with a software package for a simulation we will use as a learning tool. If you would like to bring a laptop to class that has Excel on it when you do in-class work you may do so. Otherwise, the computers in the classroom all are loaded with Excel.

Course Description
An introduction and overview of information resources commonly used in business including secondary and syndicated data resources. The focus of the course is enabling students to identify, locate, analyze, and report on business data sources both qualitatively and quantitatively.

ASU CONNECT!
As a designated ASU Connect! Course, MGMT 3332 includes learning about and practicing community engagement through Academic Service-Learning. The ASU Community Partnership Handbook defines service-learning as, “a course-based, credit-bearing, educational experience in which students: a) participate in an organized service activity that meets identified community
needs and b) reflect on the service activity in such a way as to gain further understanding of course content, a broader appreciation of the discipline, and an enhanced social responsibility.”

Course Objectives

Data analytics is a growing field within business and becoming more and more important as the amount of data available to researchers and managers grows. In this course students will be exposed to basic concepts related to data analytics, some analysis techniques, and the practice and use of data analytics in several areas. Having a grasp of the basic data analysis terms and techniques is imperative for a student of any area of business and for new managers. Therefore, this course aims to:

- Familiarize the student with the set of commonly used terms and techniques in the area of “big data” and data analytics that are in use today.
- Develop within the student knowledge that can separate the fact from fiction in the environment of data analytics.
- Develop within the student an appreciation of how data and data analytics can be used by managers to make better decisions.
- Have the student gain perspective and practice by applying data analysis techniques in several settings.
- Have the student gain an understanding of, and a familiarity with using Excel to perform data analysis and presentation.

As an academic service-learning course, MGMT 3332 also aims to:

- Have the student gain an appreciation of how consumer-based research can be used to create better service within a not-for-profit organization through participation in a class data analysis project and the academic service learning process.
- Have the student attain an appreciation of the intrinsic rewards available through community engagement.

Student Learning Outcomes

By the end of this course students should be able to:

- Articulate the need and importance of decision making in business, its inherent difficulties and pitfalls, and the importance of proper data analysis in management decision making.
- Understand how the data environment in business is changing and will continue to change in relation to management decision making.
- Apply common quantitative and visual techniques to aid in management decision making.
- Use Microsoft Excel to analyze data and provide a manager with information useful in decision making.
- Show an appreciation for working with not-for-profit organizations and within the community in general and express any intrinsic rewards they feel are available from such work.
**Methods of Assessing Learning Outcomes**
Learning outcomes will be assessed through an exam, in-class assignments, homework assignments, a simulation, and a community-based data analysis project. Peer evaluations and reflection papers will be used in assessing student learning and participation in several cases.

**Readings**
Except for the simulation package, all readings for the course will be made available to you by the course instructor (through the ASU Henderson Library on one the World Wide Web).

**Required Technology:**
Students will need to use a computer for this course. Access to Microsoft Excel and a word processing package, along with a license for the simulation discussed above, will be needed by students. Blackboard and university computer lab technical support is provided by the university’s Technology Service Center by calling 325-942-2911 or 1-866-942-2911 or by email at helpdesk@angelo.edu.

**Class Format**
Students will gain their knowledge of business research in this course through lectures, class discussions, hands-on class activities, a simulation, a community-based group project, and a number of homework assignments.

When used in class, PowerPoint lecture slides will be available before each class session for downloading and/or printing through the class page on the ASU Blackboard site.

**Graded Activities**

**Exams**
Two exam will be given during the term. Students should expect this exam to consist of multiple choice and short answer questions. Questions on the exams will test knowledge and application of the student’s knowledge.

Make up exams will be given only for reasons deemed legitimate by the Instructor and should be avoided if at all possible. If you have to miss the exam for any reason, you must notify the Instructor in advance, if you are ill or otherwise incapacitated a short phone message or email will suffice.

**Short, In-Class Assignments**
Short in-class assignments will be used throughout the term in order to get students practicing what is being covered in class. These assignments will be scored in a simple manner and will apply towards students’ individual participation grades.
Homework Assignments
Longer homework assignments will also be given during the term. These will be graded in a more traditional manner. Students will always have at least one week to complete all homework assignments (based on the assignment date and the due date).

Note that not all in-class and homework assignments may be listed on the course schedule.

Simulation
A simulation will be used to help students gain an understanding of how data analytics is used in the business world. Students will be scored based on their decision making (as they explain it) and performance on the simulation.

Group Project
We will be working on a data analysis project as one large component of this class this semester. Students will work in sub-groups of four or five students to practice completing the project. The main focus of your work on the project will be data analysis and presentation of the results.

Working in groups can be much more difficult than working individually. Be prepared to face the challenges of group work and avoid finger pointing at the end of the term. Should problems arise within your group, you should contact me immediately. Ask, and you will receive support. Peer evaluations will play a role in each group member’s final project grade, as will observations by the instructor.

Reflective Paper
This course can be considered an academic service learning course. The basic premise of such a course is to have students practice what they learn in a way that benefits the community in which they live. Therefore, the project included in this course involves working with an on-campus client (ASU is a not-for-profit organization). Part of the academic service learning process is for students to reflect on what they have learned through their involvement with such groups. This reflection will occur through a paper students will write at the end of the course.

Service Learning Survey
Students will also receive a small amount of class credit for completing a survey on the service-learning aspects of this course at the end of the term.

Attendance
Regular class attendance is expected in this course. However, as an adult it is up to you to attend class. Regular non-attendance will affect a student’s participation grade.
Course Grades
Please keep in mind that in MGMT 3332 you are graded on your performance on the graded elements of the course—you are not graded on effort. Your final class grade will depend solely on how you perform on all aspects of the course and no other factors.

The following cutoffs will be used to determine final grades in MGMT 3332:

A 90-100%
B 80-89%
C 70-79%
D 60-69%
F Below 60%

Your semester grade will consist of the following components.

<table>
<thead>
<tr>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>

Other Course Policies

Extra Credit Work
No extra credit work will be available for students in this class. Students should prepare for exams and assignments to the best of their ability. Attendance, participation, and solid work is expected from all students.

Late Assignments
Assignments are due at the start of class on the days listed in the syllabus or on the assignment handout, they must be turned into the Instructor and not to the department secretary. Assignments must be turned in by the deadlines given. Late assignments (even a few minutes) will be docked 20%. Assignments will not be accepted 24 hours or more past the stated due date and time. Plan ahead and be prepared to turn your assignments in when they are due.

Professionalism / Courtesy and Respect
Students are expected to conduct themselves professionally in all matters related to this class. This means students should act professionally in class and prepare all assignments in a professional manner.
Inappropriate verbal comments directed toward others in class and/or inappropriate written comments in assignments will not be tolerated.

**You are expected to use your phones, tablets, personal laptops, and ASU computers for class purposes only while in class.** As a matter of courtesy, check to see that your cell phone is turned off before class begins, texting during class is not allowed. Should I find that you are using your electronic device for non-class purposes or texting during class, I will ask you to leave class for the rest of the day.

Your actions in class such as talking to your neighbor, texting, reading your textbook from another class, or studying for an exam do not go unnoticed by other students in class or the class instructor. The expectation is that you are in class to learn about business research. If you would rather talk to your friends, listen to your iPod, or surf the Internet / play solitaire, you can do so out in the hall. Please, if you have other pressing matters to attend to such as talking, surfing the net, sleeping, or preparing for another class, etc., do not come to class.

**We are all expected to abide by the ASU College of Business Code of Ethics:**

Students, faculty, administrators and professional staff of the College of Business should always:

- Be forthright and truthful in dealings with all stakeholders
- Take responsibility for one's actions and decisions
- Serve as an example of ethical decision-making and behavior to others
- Admit errors when they occur, without trying to conceal them
- Respect the basic dignity of others by treating them as one would wish to be treated

**Academic Honesty**

Angelo State University expects its students to maintain complete honesty and integrity in their academic pursuits. Students are responsible for understanding and complying with the Academic Honor Code, which is contained in both print and web versions of the ASU Student Handbook. In essence, the willingness to cheat undermines our purpose at the university.

In general, all students are expected to conduct themselves in this course in a manner consistent with the University Honor Code policy which is at: [http://www.angelo.edu/forms/pdf/Honor_Code.pdf](http://www.angelo.edu/forms/pdf/Honor_Code.pdf)

Academic integrity is expected of all. This includes, but is not limited to, any form of cheating, plagiarism (presenting someone else’s work as your own), unauthorized sharing of work, or unauthorized possession of course materials. The professor assumes that all students can be trusted. Please do not violate this trust. Violation of academic integrity will result in a failing grade for the course.

If two students turn in the exact same work on statistical assignments in this class, the assignment will be graded and the grade split between all students turning in the same work.
Policy on Disabilities
Angelo State University is committed to the principle that no qualified individual with a
disability shall, on the basis of disability, be excluded from participation in or be denied the
benefits of the services, programs, or activities of the university, or be subjected to
discrimination by the university, as provided by the Americans with Disabilities Act of 1990
(ADA), the Americans with Disabilities Act Amendments Act of 2008 (ADAAA), and
subsequent legislation.

The Student Life Office is the designated campus department charged with the responsibility of
reviewing and authorizing requests for reasonable accommodations based on a disability, and it
is the student’s responsibility to initiate such a request by contacting the Student Life Office,
Room 112
University Center, at (325) 942-2191 or (325) 942-2126 (TDD/FAX) or by e-mail at
Student.Life@angelo.edu to begin the process.

Policy on Religious Observances
A student who intends to observe a religious holy day should make that intention known in
writing to the instructor prior to the absence. A student who is absent from classes for the
observance of a religious holy day shall be allowed to take an examination or complete an
assignment scheduled for that day within a reasonable time after the absence.

Course Drop
To view information about how to drop this course or to calculate important dates relevant to
dropping this course, you can visit:
November 3 is the last day to drop a course during the fall 2017 semester.

Incomplete as a Course Grade
The incomplete grade, a grade of I is only given when the student is unable to complete the
course because of illness or personal misfortune. An I that is not removed before the end of the
next long semester automatically becomes an F. To graduate from ASU, a student must complete
all Is.

Grade Appeal Process
A student who believes that he or she has not been held to appropriate academic standards as
outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may
appeal the final grade given in the course. The burden of proof is upon the student to demonstrate
the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first
discuss the matter with the instructor. For complete details, including the responsibilities of the
parties involved in the process and the number of days allowed for completing the steps in the
process, see Operating Procedure 10.03 at:
http://www.angelo.edu/content/files/14196-op-1003-grade-grievance.
