

Department of Nursing and Rehabilitation Sciences ASSOCIATE DEGREE NURSING PROGRAM LVN-RN TRANSITION PROGRAMS

Preceptor Information

Students in the accelerated Hospital Affiliate program must secure a preceptor from an acute care facility for their clinical experience. The clinical course consists of 176 hours in direct patient care, preferably in the ICU or step-down setting. The student will have the same preceptor throughout their clinical course and the preceptor may only contract to supervise one student at a time.

The preceptor's role is crucial for the success of the student and the program. To facilitate the preceptor role, the ASU instructor will supply:

- Orientation
- Curriculum information
- Faculty contact information
- Open communication at all times
- On-site visits with the preceptor and student if indicated or requested
