

Grant Title	Various
Funding Agency/Sponsor	Robert Wood Johnson Foundation
Abstract	<p>The Robert Wood Johnson Foundation seeks to improve the health and health care of all Americans. Our efforts focus on improving both the <i>health</i> of everyone in America and their health <i>care</i>—how it's delivered, how it's paid for, and how well it does for patients and their families.</p> <p>We are guided by a fundamental premise: we are stewards of private funds that must be used in the public's interest. Our greatest asset isn't our endowment; it's the way we help create leverage for change.</p> <p>We create leverage by building evidence and producing, synthesizing and distributing knowledge, new ideas and expertise. We harness the power of partnerships by bringing together key players, collaborating with colleagues, and securing the sustained commitment of other funders and advocates to improve the health and health care of all Americans.</p>
