To: 2012 ASU Meat Goat Performance Test Consignors
From: Dr. Mike Salisbury
Subject: Final Performance Data and Report

Enclosed you will find the final data on the bucks entered in the 2012 performance test. There was a total of 114 goats completing the test. The average initial weight for all bucks on test was 59.5 pounds, average final weight was 99.8 pounds and the average final Average Daily Gain was 0.48 pounds per day. The average REA for the test was 1.73 square inches. Compared to last year, all growth measurements increased.

I have enclosed several reports. The first is a report similar to the one you have received every 28 days. The second is the goats ranked on ADG. There is also a ranking of Estimated Ribeye Area (REA). REA is determined using real time ultrasound over the last rib. All goats were scanned 8 days prior to the completion of the test.

The schedule for the 2013 test will remain similar to the current year with the test completing before Labor Day. Below is the tentative schedule for next year's test. As we approach test time, I will send out a letter and copy of guidelines for the test.

Tentative Schedule

Arrive	May 23-24, 2013
Begin	June 7, 2013
Complete	August 30, 2013

As always, if you have any question or need any additional information feel free to contact me. Thank you for your participation and cooperation. I look forward to working with you in the future.
