

Respondus LockDown External Link Tutorial

Step 1: Add Link

- Go to the Control Panel of your course.
- Select a content area to put the link. In this example we're using Course Information.
- Click to add an External Link.

Step 2: Enter Information

- Under External Link Information, type the name of the link in the text box.
- Enter <http://blackboard.angelo.edu/ldb> into the URL text box.
- In the Description Text Box, type directions for your students to download the Respondus LockDown Browser. In this example, we've added the following text:

Description:

Exams in this class require you to use the Respondus LockDown Browser. The LockDown Browser is installed on all lab computers on campus. If you want to install the LDB on your personal computer, click on the link provided.

Step 3: Submit Settings

- Click
- Click to confirm.

The Respondus LockDown Browser link will now be displayed for your students to see under Course Information.
