The Proximal Zone of Professional Impact (PZPI):
**A Contextual Framework for Assessing Long-Term Influence and Impact
of Colleges of Education**

To facilitate consistent long-term assessment of institutional impact, and afford comparative analysis, CREATE has established a Proximal Zone of Professional Impact (PZPI) for CREATE institutions. The Proximal Zone of Professional Impact is comprised of the university and all school districts and campuses within a seventy-five mile radius. This proximal zone describes a “P-16” professional community in the immediate vicinity of each university, and provides each College of Education a professional laboratory setting in which to collaboratively design and implement program improvements over time and to gauge their long-term success.

While this Proximal Zone of Professional Impact does not convey the complete impact scenario of the university’s teacher preparation programs, it does provide a common and consistent setting in which the university may measure program effects over time.

From CREATE’s perspective, the PZPI offers the following advantages:

- A. It presents a useful frame of reference for Colleges of Education to utilize in assessing teaching and learning trends over time in the particular geographic area nearest their institution.
- B. It provides Colleges of Education a field laboratory for research and development activities related to planned instructional interventions.
- C. It establishes parameters of a professional community that are consistently defined across the CREATE consortium, enabling long-term program benchmarking and institutional comparisons.
- D. It provides geographic boundaries that correlate to the university’s primary admission centers.
- E. It affords a structure for long-term regional networking and professional partnerships among public and higher education institutions in the zone.
