NOTE 1: Summary of Significant Accounting Policies

ENTITY

Angelo State University is considered an Institution of Higher Education of the State of Texas, and its financial records comply with state statutes and regulations. This includes compliance with the Texas Comptroller of Public Accounts *Reporting Requirements for State Institutions of Higher Education*. Angelo State University serves the state by offering a wide range of academic programs leading to baccalaureates and masters degrees. Angelo State University is committed to providing educational excellence for Texas.

Due to the statewide requirements embedded in GASB Statement No. 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments*, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in this statement. The financial report will be considered for audit by the state auditor as part of the audit of the state of Texas Comprehensive Annual Financial Report; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

FUND STRUCTURE

The accompanying financial statements are presented on the basis of funds. A fund is considered a separate accounting entity. The fund designation for institutions of higher education is a Business Type Activity within the Proprietary Fund Type.

Proprietary Funds

Business Type Activity

Business type funds are used for activities that are financed through the charging of fees and sales for goods or services to the ultimate user. Institutions of higher education are required to report their financial activities as business type because the predominance of their funding comes through charges to students, sales of goods and services, and grant revenues.

Component Units

The fund types of the individual discrete component units are available from the component units' separately issued financial statements. Additional information about component units can be found in Note 19.

Basis of Accounting

The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Business activity type funds (proprietary funds) are accounted for on the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Proprietary funds distinguish operating from non-operating items. Operating revenues and expenses result from providing services or producing and delivering goods in connection with the proprietary funds principal ongoing operations. Operating expenses for the proprietary funds include the cost of sales and services, administrative expenses, and depreciation on capital assets.

BUDGETS AND BUDGETARY ACCOUNTING

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act). Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

ASSETS, LIABILITIES, AND FUND BALANCES/NET POSITION

Assets

Cash and Cash Equivalents

Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents. For reporting purposes, this account includes cash on hand, cash in local banks, cash in transit, and cash in the Treasury.

Investments

Investments are stated at fair value in all funds except pension trust funds in accordance with GASB Statement 31 - *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*. For pension trust funds, investments are required to be reported at fair value using the accrual basis of accounting in accordance with GASB Statement 25 - *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*.

Securities lent are reported as assets on the balance sheet. The costs of securities lending transactions are reported as expenditures or expenses in the Operating Statement. These costs are reported at gross.

Restricted Assets

Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include proceeds of enterprise fund general obligation and revenue bonds and revenues set aside for statutory or contractual requirements. Assets held in reserve for guaranteed student loan defaults are also included.

Inventories

Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost, generally utilizing the last-in, first-out method. The consumption method of accounting is used to account for inventories that appear in the proprietary fund types and the government-wide statements. The cost of these items is expensed when the items are consumed.

Capital Assets

Assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year should be capitalized. These assets are capitalized at cost or, if not purchased, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. "Inexhaustible" assets such as works of art and historical treasures are not depreciated. A road and highway infrastructure is reported on the modified accrual basis. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

All capital assets acquired by proprietary funds or trust funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the acquisition date. Depreciation is charged to operations over the estimated useful life of each asset, using the straight-line method.

Other Receivables

Other receivables include year-end accruals not included in any other receivable category. This account can appear in governmental and proprietary fund types.

Liabilities

Accounts Payable

Accounts Payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

ANGELO STATE UNIVERSITY
NOTES TO THE FINANCIAL STATEMENTS
Year Ended August 31, 2015

Other Payables

Other payables are the accrual at year-end of expenditure transactions not included in any of the other payable descriptions. Other payables may be included in either the governmental or proprietary fund types.

Employees' Compensable Leave Balances

Employees' Compensable Leave Balances represent the liability that becomes 'due' upon the occurrence of relevant events such as resignation, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or noncurrent in the statement of net position. GASB Statement No. 16, Accounting for Compensated Absences, establishes the standards of accounting and reporting for compensated absences (i.e., vacation, unpaid overtime, and sick leave) by State entities.

Capital Lease Obligations

Capital Lease Obligations represent the liability for future lease payments under capital lease contracts contingent upon the appropriation of funding by the Legislature. Liabilities are reported separately as either current or noncurrent in the statement of net position.

Bonds Payable - General Obligation Bonds

The unmatured principal of general obligations bonds are accounted for in the Long-term Liabilities column. Payables are reported separately as either current or noncurrent in the statement of net position. Bonds payable are recorded at par. The bond proceeds are accounted for as an "Other Financing Source" in the governmental funds when received, and expenditures for payment of principal and interest are recorded in the Debt Service funds when paid. These amounts are adjusted in the Long-term Liabilities column.

Bonds Payable - Revenue Bonds

Revenue bonds are generally accounted for in the proprietary funds. The bonds payable are reported at par less unamortized discount or plus unamortized premiums. Interest expense is reported on the accrual basis, with amortization of discount or premium. Payables are reported separately as either current or noncurrent in the statement of net position.

Fund Balance/Net Position

The difference between fund assets and liabilities is 'Net Position' on the government-wide, proprietary and fiduciary fund statements, and the 'Fund Balance' is the difference between fund assets and liabilities on the governmental fund statements.

Reservation of Fund Balance

Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reservations are legally restricted to a specific future use or not available for expenditure.

Reserve for Encumbrances

This represents commitments of the value of contracts awarded or assets ordered prior to year end but not received as of that date. Encumbrances are not included with expenditures or liabilities. They represent current resources designated for specific expenditures in subsequent operating periods.

Reserve for Consumable Inventories

This represents the amount of supplies, postage, and prepaid assets to be used in the next fiscal year.

Unreserved/Undesignated

This represents the unappropriated balance at year-end.

Derivative Investing

The Investment Policy Statement for the LTIF allows investment in certain derivative securities. A derivative security is a financial instrument which derives its value from another security, currency, commodity or index.

The LTIF entered into futures contracts, options, and swaps as efficient substitutes for traditional securities, to reduce portfolio risks created by other securities, or in fully hedged positions to take advantage of market anomalies.

These instruments involve market and/or credit risk in excess of the amount recognized in the Statement of Net Position. Risks arise from the possibility that counterparties will be unable to meet the terms of their contracts and from movement in index values. Futures contracts have reduced counterparty credit risk since they are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees them against default. Counterparty risk for swaps and options is mitigated by master netting agreements between the Administration and its counterparties, and by the posting of collateral on a daily basis.

The Administration's gross counterparty exposure, as of August 31, 2015, is presented below.

lawfully available funds (revenues) and balances attributable to any RFS member against the bonded indebtedness of all other RFS members for payment on the Parity Debt. Effective September 1, 2007, *House Bill 3564 (80th Legislature, Regular Session)* transferred governance of the Institution to the Texas Tech University System ("TTUS"); however, the Institution's revenues remain pledged to the RFS until TSUS can secure, from the new governing body (TTUS), a legally acceptable agreement, assuming the Institution's obligations. On April 24, 2008, as authorized by *House Bill 3564*, the Texas Higher Education Coordinating Board, on the advice of the Texas Attorney General, issued a ruling and endorsed an Agreement obligation to honor the Institution's bonded indebtedness. TTUS signed and returned the agreement January 14, 2009. On January 23, 2009 TTUS delivered to TSUS a \$53,015,628 "Board of Regents of Texas Tech University System Revenue Financing System Refund Note, Thirteenth Series (2008)", dated September 15, 2008 securing the remaining TSUS debt attributable to Angelo State University. On April 24, 2009 TTUS called \$7,215,000 of TSUS debt reducing the TSUS debt balance attributable to the institution by \$7,211,264.87.

In FY 2015, \$17,550,000.00 of Texas State University System debt was refunded and new debt was financed by Texas Tech University System on behalf of Angelo State University. The 2005 series refunding resulted in debt service savings of \$273,960.26 and a total net present value savings of \$259,243.73. The 2006 series refunding resulted in debt service savings of \$1,319,747.75 and a total net present value savings of \$998,516.08.

ASU must repay the remaining debt that was issued by TSUS on its behalf; consequently, the following debt amortization schedule is presented for informational purposes only.

accounts. The unemployment plan is on a pay-as-you-go basis, in which no assets are set aside to be accumulated for the payment of claims. No material outstanding claims are pending at August 31, 2015.

Angelo State University by state law is required to be a participant in the Worker's Compensation Program and Pool managed by the State Office of Risk Management (SORM). Texas statutes require participation of all state agencies, directors and officers liability, employee blanket bond, and property and casualty programs.
