# PERFORMANCE ANALYSIS FOR COLLEGES OF EDUCATION (PACE) 

#### Abstract

ABOUT CREATE The Center for Research, Evaluation and Advancement of Teacher Education (CREATE) is a research and development consortium of 58 universities within The University of Houston System, The Texas A\&M University System, The Texas State University System, and The University of Texas System, as well as other public and private institutions across the State. CREATE's primary stakeholders are the 5 million children who attend Texas public schools. We offer valuable evidence-based resources to university-based teacher preparation programs and public school districts. We actively promote, sponsor, and disseminate quality research on educator preparation, educator retention and K-12 student achievement. Our priorities are focused on research with the greatest potential to make a difference to educator preparation practice and ultimately, student outcomes.

## PACE and its Future

This year marks CREATE's $10^{\text {th }}$ year to produce the Performance Analysis for Colleges of Education (PACE) for consortium members. To mark this anniversary, several changes were undertaken. During Phase I, we sought to improve the functionality of the data by moving it from a database to a data warehouse. This allowed us to automate the production of the PACE books and also to offer more expanded data services. In light of this change, this is the last year the printed book will be disseminated. In future years, each university will be able to run and print copies of their PACE book from the createtx.org website using a unique log in and password. During Phase II, we will be making the data more interactive and visual. This offering will be by subscription and will allow consortium members more flexibility in accessing detailed information about students in their programs through a web-based platform. We hope PACE continues to be a useful tool for improving policy, practice, and ultimately the capacity of our educators to enhance learning for all students in Texas.

Since its inception, as a consortium of universities devoted to on-going analysis and continuous quality improvement of university-based teacher preparation, the Center for Research, Evaluation and Advancement of Teacher Education (CREATE) has sought to develop planning and information systems that can assist universities in professional analysis of their teacher preparation initiatives, particularly as these practices relate to long-term teacher influence and effect.

The preparation of effective teachers for Texas public schools is of paramount importance in assuring sound economic footing and an enhanced quality of life for all Texans. To this end, university-based teacher preparation is of great public significance in the state, worthy of careful attention, and an important subject of continuous quality improvement.

## What PACE Provides

PACE presents a useful reporting system for universities and their Colleges of Education centered on public schools. Reports are intended to be used as a planning and resource tool that can assist teacher education leaders in assessing needs, targeting refinements in their preparation programs, and evaluating organizational effects over time. PACE reports are intended to address the following objectives:

1. Present a system which describes and charts a Proximal Zone of Professional Impact (PZPI) for each CREATE institution, within which to consider longterm program interventions and measure effectiveness of university educator preparation programs.
2. Provide a school-centered tool that can assist in the continuous quality improvement of university-based educator preparation programs.
3. Provide information that will enable university and public school leaders to track long-term trends related to public schools in their immediate area related to teacher production, teacher supply in relation to regional demand, and teacher retention patterns.
4. Furnish a structured format that will enable university and public school leaders to engage in systematic analysis of production, academic performance, and staffing patterns in their immediate vicinity.

PACE is offered as a common data platform that can assist all consortium members in establishing a school-centered planning focus. However, PACE data must be augmented with university program information in order to thoroughly answer critical evaluation questions about each institution's educator preparation programs. Such questions include who is teaching? Where do teachers go after they leave the program? How long do teachers remain in the profession? Hopefully, the information found in PACE will encourage users to integrate local university information to inform teacher preparation practices at the campus and regional level.

As an information system, the PACE reports are subject to continuous quality improvement. In Year 10, the core reports on university and teacher production, professional impact trends, and benchmarking have been retained. Modifications will continue to be made to the State of Texas Assessments of Academic Readiness (STAAR) accountability reports until the accountability system is fully implemented.

It is also important to note that PACE reports are derived from Texas state data sources. Large files of this size and scope are always subject to variability and standard degree of error. To this end, it is imperative that PACE users verify and authenticate these reported data prior to final analysis and interpretation. CREATE staff stand ready to assist in answering questions or clarifying issues regarding data quality and data definitions. A summary of changes made to the 2016 PACE reports and information about whom to contact regarding data requests and data errors can be found on page 64 .

## CREATE Assumptions about the Professional Influence and Impact of Colleges of Education

The PACE report is based upon key assumptions that are central to CREATE's mission and program of work. CREATE assumes the following with regard to the professional influence and impact of Colleges of Education.

1. Colleges of Education are an integral component of a system of public education and, as such, have a professional obligation to contribute to the continuous quality improvement of public school teaching and K-12 academic performance.
2. Colleges of Education can and do influence continuous quality improvement of public school teaching and K-12 academic performance through their core functions of:

- educator preparation
- research and development
- service to the profession

3. To optimize professional influence, Colleges of Education leaders must regularly assess the status of public school teaching and student academic performance, and based upon identified needs, work with their public school partners to develop and implement program interventions that support measured improvement over time.
4. The College of Education's long-term effects on public school teaching and K12 academic performance can best be assessed through:

- on-going analysis of the College's educator production, placement and retention trends
- faculty and graduate student research and development activities
- faculty and staff service to the local profession as implemented in a Proximal Zone of Professional Impact (PZPI)

5. Active collaboration between university faculty and public school officials in planning, implementing and/or assessing educational interventions in the PZPI should be encouraged within every College of Education.

## The Proximal Zone of Professional Impact (PZPI): <br> A Contextual Framework for Assessing Long-Term Influence and Impact of Colleges of Education

To facilitate consistent long-term assessment of institutional impact, and afford comparative analysis, CREATE has established a Proximal Zone of Professional Impact (PZPI) for CREATE institutions. The Proximal Zone of Professional Impact is comprised of the university and all school districts and campuses within a seventy-five mile radius of the university. This proximal zone describes a "P-16" professional community in the immediate vicinity of each university, and provides each College of Education a professional community in which to collaboratively design and implement program improvements over time and to gauge their long-term success.

While this Proximal Zone of Professional Impact does not convey the complete impact scenario of the university's educator preparation programs, it does provide a common and consistent setting in which the university may measure program effects over time.

From CREATE's perspective, designating a PZPI offers the following advantages:

1. It presents a useful frame of reference for Colleges of Education to utilize in assessing teaching and learning trends over time in the particular geographic area nearest their institution.
2. It provides Colleges of Education a field laboratory for research and development activities related to planned instructional interventions.
3. It establishes parameters of a professional community that are consistently defined across the CREATE consortium, enabling long-term program benchmarking and institutional comparisons.
4. It provides geographic boundaries that correlate to the university's primary admission centers.
5. It affords a structure for long-term regional networking and professional partnerships among public and higher education institutions in the zone.

## Data Sets Used in the PACE Report

The data used to compile the PACE reports are based on the following data sets, listed in alphabetical order:

Integrated Postsecondary Education Data System (IPEDS). University production data were downloaded from The National Center for Education Statistics (NCES) through the IPEDS Data Center (http://nces.ed.gov/ipeds/datacenter).

Proximal Zone of Professional Impact (PZPI). This data set, produced by CREATE, contains a list of the K-12 public schools and districts within a 75 -mile radius of each university in the CREATE consortium offering teacher preparation.

Teacher Assignment Data Set. This data set, obtained from the Texas Education Agency (TEA), matches each teacher to the district and campus(s) in which he or she teaches. The type of information available includes the specific course and subject area assignments by percentage of full-time equivalent (FTE) for all teacher of record in every Texas public school.

Teacher Certification Data Set. This data set, also obtained from TEA, lists information about each Texas teaching certificate obtained by a qualified applicant in Texas. The data are available from FY 1994 through the current year. It is a dynamic data set in that changes are made on a daily basis. Thus, any analysis based on a Teacher Certification Data Set purchased in one month will likely differ somewhat from an analysis based on a data set purchased in another month.

Texas Academic Performance Reports (TAPR). Information about student academic performance is detailed and combined with financial reports and information about staff for every public school campus and district in Texas. STAAR performance, is available from the TEA website at (https://rptsvr1.tea.texas.gov/perfreport/tapr/) from 2012-2013 through 2014-2015. Prior to the 2012-13 school year, TAPR was known as the Academic Excellence Indicator System (AEIS). Those reports, for school years 1990-91 through 2011-12, are available in the AEIS Archives. (https://rptsvr1.tea.texas.gov/perfreport/tapr/).

Texas Higher Education Accountability System. This data is used to track performance on critical measures that exemplify higher education institutions' missions. It is an interactive website (http://www.txhighereddata.org/Interactive/Accountability/), providing information related to the newly-initiated program, 60X30 TX. Information about university production was downloaded from the THECB Prep Online site http://www.txhighereddata.org/Interactive/PREP_New/).

## How to Use and Apply the PACE Report

PACE is intended as a tool to assist universities, their Colleges of Education, and their leadership teams in analyzing teaching and learning trends within their institutions and within the public schools of the surrounding area. PACE offers a structure to monitor and gauge long-term professional improvement. The data included in this report are important, therefore, only to the degree that each university chooses to address them in a systematic and continuous manner. It is hoped that the PACE reports will be used as planning tools that universities will use to create institutional mechanisms for the on-going modification of their educator preparation programs, as well as other educational programs. Based on this intended use, we recommend the following actions associated with the PACE reports:

1. Organize and empower an educator preparation leadership team which includes both university and public school partners (a standing work committee) to analyze and interpret these data as well as recommend organizational improvements based on the needs identified.
2. Verify and validate the state data sets to be certain that they are relatively consistent with comparable data reported by the university. Extend and augment the data in the PACE reports with university data bases and programmatic information available only at your institution.
3. Develop an institutional report which identifies regional teaching and learning needs. Disseminate this report extensively within and outside the institution.
4. In conjunction with school district partners, plan, implement and evaluate program improvements intended to address regional teaching and learning needs. Encourage experimental research and development projects with partners based on these planned interventions.
5. Build regional collaboratives based on the needs identified and the organizational interventions pursued.

## How CREATE Can Assist

CREATE will continue to refine the PACE reports and data sets for annual distribution. Consortium institutions will continue to be able to purchase the customized data for a fee. Information about ordering the customized data set is found on page 64 and on the CREATE website at www.createtx.org.

## I.

Educational Trends in University's Proximal Zone of Professional Impact
A.

Descriptive Reports on the Characteristics of Public Schools in the Proximal Zone of Professional Impact

## SECTION A: <br> Descriptive Reports on the Characteristics of Public Schools in the Proximal Zone of Professional Impact

The reports in Section A provide information about the characteristics of public and charter schools located within a 75 -mile radius of the target university. The definitions used to generate the various reports in Section A are discussed below. Please see Section V in the Table of Contents for a complete listing of the original data sources and the year(s) of data used to complete Section A reports.

## A.1: Summary of Public School Enrollment in the Proximal Zone of Professional Impact (PZPI).

This report provides a summary of student enrollment within the PZPI by various subpopulations of students. The data include the number and percent by school level for race/ethnicity, economically disadvantaged, special education, bilingual, and limited English proficient (LEP)/English language learners (ELL)/ students, and students who are at risk for dropping out of school. Percentages of students in special categories will NOT add up to $100 \%$ because different denominators are used to calculate level percentages. The definitions of the subpopulations are described below:

Economically Disadvantaged: Economically disadvantaged students are those coded as eligible for free or reduced price lunch or eligible for other public assistance. (Source: TEA, Glossary for the 2014-2015 Texas Academic Performance Report (TAPR), page 10) found at https://rptsvr1.tea.texas.gov/perfreport/tapr/2015/glossary.pdf;

Special Education: This refers to the population served by programs for students with disabilities. (Source: TEA, 2013. Subchapter AA. Commissioner's Rules Concerning Special Education Services found at http://ritter.tea.state.tx.us/rules/tac/chapter089/ch089aa.html; also see Texas Education Code (TEC) §29.001-29.020 found at http://www.statutes.legis.state.tx.us/Docs/ED/pdf/ED.29.pdf.

Bilingual: This refers to the number of current LEP or ELL students receiving either Bilingual Education (BE) or ESL program services. Refer to the definition of LEP below. (Source: TEA, 2015, Subchapter BB. Commissioner's Rules Concerning State Plan for Educating English Language Learners found at http://ritter.tea.state.tx.us/rules/tac/chapter089/ch089bb.html; also see the Texas Education Code (TEC) §29.051-29.064-Bilingual Education and ESL Programs found at http://www.statutes.legis.state.tx.us/Docs/ED/htm/ED.29.htm\#B).

Limited English Proficient (LEP) or English Language Learner (ELL): These are students who are in the process of acquiring English and have another language as their first native language or have been identified as limited English proficient by a district's Language Proficiency Assessment Committee (LPAC) according to criteria established in the Texas Administrative Code. The terms English language learner and limited English proficient student are used interchangeably (TEC, 29.052). Not all pupils identified as LEP (or ELL) receive bilingual or English as a second language instruction, although most do. (Source: TEA, 2015. Commissioner's Rules Concerning State Plan for Educating English Language Learners. Chapter 89: Adaptations for Special Populations, Subchapter BB found at http://ritter.tea.state.tx.us/rules/tac/chapter089/ch089bb.html); also see TEA, Glossary for
the 2014-2015 Texas Academic Performance Report (TAPR), page 11 found at https://rptsvr1.tea.texas.gov/perfreport/tapr/2015/glossary.pdf.

At-Risk: These are students identified as being at risk of dropping out of school using state- criteria only. (See TEC §29.081, Compensatory and Accelerated Instruction). (Source: PEIMS, Oct. 2014). Glossary for the 2014-2015 Texas Academic Performance Report (TAPR), page 4 found at https://rptsvr1.tea.texas.gov/perfreport/tapr/2015/glossary.pdf.

## A.2: Public School Enrollment by District in the Proximal Zone of Professional Impact.

This report is the first page of a supplemental document (See Attachment 1 for a full inventory) showing public school enrollment in the PZPI in different configurations. All districts and charter schools in the target university's PZPI are listed in the first column. Then, the next six columns show the number of campuses by school level (elementary, middle, high, and elementary/ secondary). The middle section, columns eight through thirteen, disaggregate student enrollment by ethnicity and school level. The last five columns disaggregate the district's enrollment of selected student subpopulations by school level.

## A.3: Public School Listings in the Proximal Zone of Professional Impact.

This report is the first page of a supplemental document (See Attachment 2 for a full inventory) listing all districts and campuses (including charter schools) within the university's PZPI. The listing includes the district name, campus code and campus name, school type (elementary, middle, high, and elementary/secondary), school size, and 2014-2015 STAAR accountability ratings. The campus accountability rating uses the following system:

M = Met Standard
A = Met alternative standard
I =Improvement required
X = Not rated
Z = Not rated
Requirements for each rating can be found in the 2015 Accountability Manual on the TEA website at https://rptsvr1.tea.texas.gov/perfreport//account/2015/manual/Chapter\ 02_Final.pdf or the Master Reference for Data Elements Used in the Accountability System found at https://rptsvr1.tea.texas.gov/perfreport/account/2015/download/acctref.html.

Educational Trend Reports on Public Schools in the Proximal Zone of Professional Impact

## SECTION B:

## Educational Trend Reports on Public Schools in the Proximal Zone of Professional Impact

Section B describes student enrollment and academic trends within the PZPI. The PACE reports in this section were redesigned to accommodate updates to the State of Texas Assessments of Academic Readiness (STAAR®) examinations. There will be yearly changes to the rating criteria and targets of the performance standards until the performance index framework is fully implemented in 2022. Figures showing the performance standards for the phase-in levels can be found at http://ritter.tea.state.tx.us/rules/tac/chapter101/ch101cc.html\#division4.
Please note that the material on accountability on the TEA website is constantly being updated, revised, and rearranged. STAAR data used in this section can be downloaded on the Texas Education Agency website at: https://rptsvr1.tea.texas.gov/perfreport/tapr/2015/download/DownloadData.html. The technical guide explaining the accountability system can be found at
http://ritter.tea.state.tx.us/perfreport/account/2015/manual/manual.pdf.
The STAAR data compiled for high schools has been limited to academic years 2013-2014 and 2014-2015. Data from previous years is not comparable due to changes by the legislature in the number of end-of-course (EOC) assessments required in high school. Data for the following EOC examinations are represented: English I (combined reading and writing score); English II (combined reading and writing score); algebra I; biology; and U.S history.
The STAAR data compiled for middle and elementary schools are for three academic years (20122013 through 2014-2015). Included are annual assessments for: grades $3-8$ reading and mathematics; grades 4 and 7 writing; grades 5 and 8 science; and grade 8 social studies.

The definitions used to generate the data in the various reports in Section B are discussed below. Please see Section V in the Table of Contents for a complete listing of the original data sources and the year(s) of data used to complete this section.

## B.1: Student Enrollment Trends in the Proximal Zone of Professional Impact.

This two-page analysis describes the trends in student enrollment within the PZPI from FY 2012 to 2015. The enrollment data are disaggregated by school level and student racial/ethnic categories. Other charts describe trends and distributions for other special student subpopulations (e.g. economically disadvantaged, students in bilingual programs, and special education).

## B.2: Student Academic Performance in the Proximal Zone of Professional Impact: High School STAAR Performance Summary.

This report compares STAAR Performance (percent passing at Phase-in I, Level 2) of high school students in the PZPI with state high school STAAR performance in English I, English II, algebra I, biology, and U.S. history for academic years 2013-2014 and 2014-2015.
B.2.1- B.2.5: High School STAAR Performance by Ethnicity in English I, English II, Algebra I, Biology, and U.S. History: This series compares two years of high school end of course STAAR performance in core academic subjects by ethnicity. For each core subject in the series, the number of students taking the exam and the percent passing at Phase-in I, Level II or above are represented.

## B.3: Student Academic Performance in the Proximal Zone of Professional Impact: Middle School STAAR Performance Summary.

These charts compare STAAR Performance of middle school students in the PZPI with state middle school STAAR performance in reading, writing, mathematics, science and social studies in academic years 2013-2015. The data for each core subject are aggregated by level and grade at Phase-in 1, Level II and above for campuses designated by the state as middle level.
B.3.1- B.3.5: Middle School STAAR Performance by Ethnicity in Reading, Writing, Mathematics, Science, and Social Studies: This series of analyses compares three years of middle school STAAR performance in core academic subjects by ethnicity. The number of students taking the exam and the percent passing at Phase-in 1, Level II or above are represented.

## B.4: Student Academic Performance in the Proximal Zone of Professional Impact: Elementary School STAAR Performance Summary.

This report compares three years of STAAR Performance of elementary school students in the PZPI with state elementary school STAAR performance in reading, writing, mathematics, and science. The data are aggregated by subject and grades at Phase-in 1, Level II and above for campuses designated by the state as elementary.
B.4.1- B.4.4: Elementary School STAAR Performance by Ethnicity in Reading, Writing, Mathematics, and science. This series of analyses compare three years of elementary school STAAR performance in STAAR-tested academic subjects and grades disaggregated by ethnicity. The number of students taking the exam and the percent passing at Phase-in 1, Level II or above are represented.

## B.5: Highest and Lowest Performing Schools by Level.

The last set of reports in this section lists the 25 highest and lowest performing high, middle, and elementary schools. Although the six reports show the results of different subjects, the format of the table is the same. Each lists the district and campus names, the campus enrollment, the percent of students who are economically disadvantaged, the percent of minority students at the campus, the subject, the number of students taking the STAAR test in a subject, the percent of students who passed at Phase-in 1, Level II or above, and the percent of those students who passed at Phase-in 1, Level II at the advanced level.
B.5.1 and B.5.2: 25 Highest and Lowest Performing High Schools Ranked by STAAR Algebra I Performance: These two reports list the 25 highest- and lowest-performing high schools in the PZPI on the following STAAR-tested subjects: Algebra I, Biology, U.S. History, English I, and English II.
B.5.3 and B.5.4: 25 Highest and Lowest Performing Middle Schools Ranked by STAAR Reading Performance: These two reports list the 25 highest- and lowest-performing middle schools in the PZPI on the following STAAR-tested subjects: Reading, Mathematics, Writing, Science, and Social Studies.
B.5.5 and B.5.5: 25 Highest and Lowest Performing Elementary Schools Ranked by STAAR Reading Performance: These two reports list the 25 highest- and lowest-performing elementary schools in the PZPI on the following STAAR-tested subjects: Reading, Mathematics, Writing, and Science.

University and Teacher Production Reports

## SECTION C: <br> University and Teacher Production Reports

Section C provides data on university production trends, university teacher and certificate production, as well as data regarding other producers of teachers in the PZPI. Please see Section V in the Table of Contents for a complete listing of the original data sources used to complete the Section C reports.

## C.1: Five-Year University Production Trends.

This report shows five-year trend data describing university enrollment, degrees awarded and the number of teachers produced. The "Teachers Produced by Pathway" section calculates teacher production for all university pathways.

## C.2: Teacher Production Trends for University Completers.

This analysis provides the total number of teachers produced from FY 2005 through FY 2015 for all university pathways. Teacher production is defined as the total number of individuals (unduplicated) receiving any type of teacher certification from a university-based program during a complete academic year that runs from September $1^{\text {st }}$ of one year through August $31^{\text {st }}$ of the next year. For example, the 2015 production count includes university completers from all university pathways who obtained certification in any academic semester between September 1, 2014 and August 31, 2015. It is important to note that certification cohorts are not graduation cohorts. A program typically graduates more individuals than those who actually obtain certification in that year. Individuals often graduate and obtain certification in a subsequent academic year.

The formula used to calculate the one-year change as a percent was: 2015-2014/2014 x 100\%. The formula used to calculate the five-year change was: 2015-2010/2010 x $100 \%$.

## C.3: Teacher Production by Race/Ethnicity.

This analysis provides the number and percentages of individuals produced from FY 2005 through FY 2015 disaggregated by race/ethnicity. The race/ethnicity of the individual is selfreported. The three and five year change is reported as a number rather than a percent.

## C4: Initial Certification Production by Level.

This analysis shows initial standard certificate production disaggregated by level over a ten-year period (FY 2006-2015). During any certification year, the number of certificates is greater than the number of teachers produced since many teachers obtain more than one certificate. A fiveyear average certificate production is calculated.

Certification data are based upon when the individual initially applies for certification. For example, a person may complete a program in FY 2010, yet decide not to obtain certification until FY 2013. Such an individual would be included in the 2012-2013 certification cohort rather than the 2009-2010 certification cohort. TEA generally uses the date of the initial application as the date of certification.

## C.5: Other Producers of Teachers in the Proximal Zone of Professional Impact.

This report shows the ten-year production trends for other suppliers of teachers in the same PZPI as the target university sorted from highest to lowest producer. The listing shows the unduplicated number of individuals obtaining standard certification though an approved Texas educator preparation program.

${ }^{1}$ Individual candidates may receive multiple certificates.
${ }^{2}$ Certificate year equals fiscal year (Sept. 1 - Aug. 31).
${ }^{3}$ Includes all other elementary bilingual ESL and bilingual certificates.
${ }^{4}$ Includes all other elementary ESL certificates.
${ }^{5}$ Includes all other 1-6, 1-8, and PK-6 self contained certificates no longer issued. ${ }^{6}$ Includes all other 4-8 and 6-12 ESL certificates.

Includes certificates in technology education; family and consumer sciences composite; human development and family studies; hospitality, nutrition, and food sciences; agriculture, science, and technology; agriculture, food and natural resources; business education, business, and finance; science, technology, engineering, and mathematics; marketing education; marketing; health science technology; health science; trade and industrial education; career and technical education.
${ }^{8}$ Includes certificates issued in art, music, theatre.
Includes certificates issued in special education, teacher of the deaf and hard of hearing, and teacher of students with visual impairment.

${ }^{2}$ Certificate year equals fiscal year (September 1-August 31).
D.

Professional Impact Reports

## SECTION D: <br> Professional Impact Trend Reports

Section D includes information about teacher and district hiring patterns, the placement of university completers within the PZPI, and retention rates for the 2012 cohort of first-year teachers.
D.1.1-3: Teacher Hiring in the Proximal Zone of Professional Impact. These three reports show school district hiring patterns in the PZPI by comparing the supply of new teacher FTEs provided by a preparation program to the total FTEs employed by subject area and school level. The category "Teachers Supplied" is defined as the number of newly-hired teacher Full Time Equivalents (FTEs) in the PZPI who obtained probationary or standard certification from the preparation program in 20142015 with no prior teaching experience. The category "District Hires" is defined as the number of newly-hired teacher Full Time Equivalents (FTEs) employed in the PZPI in 2015-2016. A hiring ratio was calculated to represent the impact of university teacher production in the PZPI for that certification cohort.

## D.2: Percentage of Newly-Certified Teachers Employed Inside and Outside the Proximal Zone

 of Professional Impact. This analysis shows the percentage of the university's newly-certified teachers (those obtaining a standard certificate with no prior teaching experience) employed within a seventy-five mile radius of the university.
## D.3: District Hiring Patterns of University-Prepared Teachers in the Proximal Zone of

 Professional Impact. This report is the first page of a supplemental document comparing the 20152016 hiring patterns of districts in the university's PZPI (See Attachment 3 to view the full report). The first chart shows which PZPI districts employed teachers from the university in 2015-2016 who were newly-certified in 2014-2015. The second shows the same information for all teachers employed in the PZPI in 2015-2016 who were certified through the university between 1994-1995 and 20142015.D.4.1-3: Percentage of University Completers in the Proximal Zone of Professional Impact by Level. This set of analyses provides information about the percentage of Full Time Equivalents (FTEs) certified through the university's preparation program since 1994-1995 who are employed at a campus within the PZPI disaggregated by level. To provide context about the campus, the percent of school students classified as economically disadvantaged is provided. The column labeled "\# School FTEs" shows the total number of teacher FTEs at the campus. The columns labeled "\# Univ FTEs" and the "\% Univ FTEs" show the total number and percent of FTEs employed at that campus who obtained certification from the target university's preparation program from 1994-1995 through 20142015.
D.5: Comparison of Teacher Retention Trends. D.5: Five-Year Retention of First-Year Teachers. The table and corresponding graphic displays the five-year teacher retention and attrition rates for firstyear teachers certified in 2010-2011 who became employed in a Texas public school in 2011-2012. A first-year teacher is defined as an individual issued either a standard or probationary certificate in 2010-2011 who had no prior teaching experience. The retention rate for spring 2012 is always $100 \%$ in each analysis because the analysis starts with all cohort members employed in Texas public schools in 2011-2012. The target university's retention rates are compared with CREATE public and private universities, profit and nonprofit ACPs, and the state total. D.5.1-3: Five-Year Retention of First-Year Teachers by School Level. These reports further disaggregate the five-year retention rates and attrition rates of first-year teachers by high, middle, and elementary school level.

# III. <br> University Benchmarks to Guide Improvement 

E.

University Comparison Reports

## SECTION E:

## University Comparison Reports

Section E contains comparison information among universities regarding teacher and certificate production, and teacher retention.

Comparison universities were systematically selected for each university by choosing the two closest universities in proximity to the target university. The data associated with each university represent that university's Proximal Zone of Professional Impact. If there were more than two universities in the target university's PZPI, the two having the highest correlation based on student enrollment in the PZPI were chosen as the comparison universities. When there were no universities in the PZPI, CREATE staff used professional judgment to determine the comparison universities.

## E.1: Comparison of Teacher Production.

The table and accompanying graph in this report compares teacher production over a ten-year time period between the target university and two comparison universities. The production number represents the number of unduplicated individuals obtaining certification through all university pathways in any given fiscal year. A ten-year total and a ten-year average are computed.

## E.2: Five-Year Teacher Production of Consortium Universities.

This report shows the five-year teacher production of all CREATE consortium institutions from 2011-2015. The data are sorted into quintiles by the five-year average with the universities in Quintile 1 having the highest average number of teachers, and Quintile 5 having the fewest.

## E.3: Comparison of Longitudinal Certificate Production Trends.

The data for this comparison come from individual university data found in Report C.4. See the C. 4 data explanation on page 39 for a more detailed description of initial certification production.

## E.4: Teacher Retention Comparison.

The data for this comparison includes only those teachers with no prior teaching experience who obtained a standard certificate in FY 2011, became employed in a Texas public school in AY 2011-2012, and were still teaching in the spring of each academic year. This report should NOT be compared with the D. 5 report found on page 54 because that report includes all first year teachers whether they obtained a probationary or a standard certificate in 2011-2012. Report E.4, on the other hand, includes only those individuals who obtained a standard certificate in 2010-2011 and met the above criteria. The column labeled Attrition Rate is calculated by subtracting the 2016 retention rate from $100 \%$.

Includes certificates issued in special education, deaf and hard of hearing and teacher of students with visual impairment.

# Teacher Retention Comparison Five-Year Retention Rates for the Certification Cohort of 2011 ${ }^{1}$ 2012-2016 <br> Angelo State University 

| Preparation Program Name | Percent Retained in Spring of Academic Year |  |  |  |  | Attrition |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | Rate |
| Angelo State University | 100.0 | 98.4 | 95.3 | 87.5 | $\mathbf{8 4 . 4}$ |  |
| University of Texas - Permian Basin | 100.0 | 94.3 | 82.9 | 78.6 | 77.1 |  |
| Sul Ross State University - Alpine | 100.0 | 100.0 | 83.3 | 66.7 | 62.9 |  |

${ }^{1}$ Includes only teachers obtaining certification in FY 2011, becoming employed in AY 2012 with no teaching experience prior to 2012.

## PERFORMANCE ANALYSIS for COLLEGES of EDUCATION

## Changes Made to the 2016 PACE Reports

## Section B: Educational Trend Reports on Public Schools in the Proximal Zone of Professional Impact.

B.2, B.3, B.4: STAAR performance summary represents each end of course subject as a separate chart (pages 16, 22, 28).
B.2.1-B.2.5: Change in chart type for STAAR academic performance by ethnicity. Current end of course subjects are represented: English I (reading and writing combined), English II (reading and writing combined), Algebra 1, Biology, and U. S. History.
B.3.1-B.3.5: Change in chart type (pages 23-27).
B.4.1-B.4.4: Change in chart type (pages 29-32).
C.4: $\quad$ Minor changes to some certificate names (page 43).
D.1.1-D.1.3: Change in numbering system from D.1.a-D.1.c (pages 46-48).

## Data Corrections and Data Requests

The 2016 PACE Report is intended for use by various educational stakeholders. The data presented should be validated by each individual university. Depending on each university's particular need, CREATE offers additional support and technical assistance.

Customized data are available for purchase based on university production. All inquiries regarding PACE, information about how to order a customized data set, or how to obtain a university username and password can be found either on the CREATE website at www.createtx.org or by contacting the following person:

Sherri Lowrey
CREATE Director of Research
713-743-0870
slowrey@createtx.org

# Performance Analysis for Colleges of Education (PACE) 

2016 REQUEST FOR CUSTOMIZED TEACHER CERTIFICATION AND EMPLOYMENT DATA

Please allow a minimum of 4 weeks for the report to be completed and delivered.

University: $\qquad$
Date of Request: $\qquad$
Name: (Person requesting data report) $\qquad$
Title: $\qquad$
Mailing Address: $\qquad$
City: $\qquad$ State/Zip: $\qquad$
Email Address: $\qquad$ Phone: $\qquad$

Upon receipt of the request, CREATE will send an invoice for payment. Please indicate to whom and where the invoice should be directed if it is different than the information above.

Name: (Send invoice to) $\qquad$
Mailing Address: $\qquad$
City: $\qquad$ State/Zip: $\qquad$
If using a Purchase Order, please submit a copy of the purchase order addressed to University of Houston Attn: CREATE with this request.
P.O. Number: $\qquad$

To order a customized data set, complete this form and email to Sherri Lowrey at slowrey@createtx.org
