June 6th Event Re-Cap
At this event, students updated their contact information with me as well as provided information about what their current future plans look like. Students participated in outdoor team building activities, got to meet other students in the program, learn more about the program, eat lunch, and participate in an engineering activity challenge. Students were reminded of the program benefits such as access to the ASU gym, lake house, library, computer labs, etc. I encourage students to utilize the perks.

What to do during Junior Year
1) Take your ACT/or SAT
   - It is very important to sign up to take the ACT or SAT during junior year of high school. Why? Because college applications open as early as August 1st of senior year!
2) Research colleges/universities
   - Make sure to look into costs, scholarship opportunities, academic support (tutoring, etc.), and most importantly, if the program/major you are wanting to pursue is available.

Did you miss the event?
If you missed the event and have not let me know, please do so ASAP. You need to be attending the events and be in contact via phone/email communication to remain an active participant in the program. There is a form I need you to complete and you can set up a time to come pick up your program t-shirt that were handed out at the event.
