Fundamentals of Physics II
PHYS 2426 010
Fall 2018
VIN 158, MWF 11:00-11:50

Instructor: Scott Williams (VIN 128)

Office Hours: MWF 8:00 - 9:00 and 10:00 - 11:00, MW 14:00 – 16:00, and by appointment

E-mail: scott.williams@angelo.edu

Required Texts: Physics for Scientists and Engineers, by Serway and Jewett (any edition), and Physics 2426 Laboratory Manual, Fall 2018 edition

Course Description: A comprehensive course with emphasis placed on the capacity to utilize fundamental concepts of electricity, magnetism, and optics in the solution of problems.

Student Learning Outcomes: Upon completion of Physics 2426, students will have an increased understanding of the fundamental concepts, theories and physical laws relevant to the broad topical areas of electricity, magnetism, circuits, and optics. Students will have practiced and demonstrated a satisfactory level of mastery in critical reading, critical thinking, and problem solving skills. Students will have engaged in quantitative laboratory experimentation; practiced sound scientific laboratory methods; and utilized a variety of different laboratory measurement techniques, general laboratory skills, data analysis procedures, and error propagation techniques. Students will also develop and improve technical communication skills required for scientific reporting. These outcomes will be assessed using test grades and laboratory grades.

Policies: Mobile phones and music players must be turned off at all times. Note that this means that you cannot use a mobile phone as your calculator. Use of any electronic device other than your calculator during a test is not allowed. There are no make-up opportunities for quizzes or in-class activities. Homework will be assigned approximately once or twice a week. Homework is due at the beginning of class, before lecture begins. Late homework will be accepted for a 4-day period following the original due date/time. For every day the homework is late after the original due date, 25% will be deducted from the assignment's score.

Grading: Final grades are based on laboratory report, homework, in-class activity, quiz, and test grades. Four regular tests will be given during the semester. A comprehensive final test will be given during the normal final test time for this lecture period. Final grades will be weighted as follows:

- laboratory reports: 25%
- homework, activities, and quizzes: 15%
- tests: 40%
- final test: 20%

Accommodations: Persons with disabilities which may warrant academic accommodations must contact the Student Life Office (UC 112) in order to request and to implement academic accommodations. A student who intends to observe a religious holy day should make that intention known in writing to the instructor prior to the absence. A student who is absent from classes for the observance of a religious holy day shall be allowed to take an examination or complete an assignment scheduled for that day within a reasonable time after the absence.

Honor Code: Angelo State University expects its students to maintain complete honesty and integrity in their academic pursuits. Any student caught cheating will receive a grade of F for the semester. Students are responsible for understanding the Academic Honor Code, which is contained in both print and web versions of the Student Handbook.
Course Schedule

27 August-29 August  
Ray Optics (chapter 35)

31 August-5 September  
Image Formation (chapter 36)

7 September-10 September  
Wave Optics (chapter 37)

12 September-14 September  
Diffraction and Polarization (chapter 38)

17 September  
Review

19 September  
Test #1

21 September-24 September  
Electric Fields (chapter 23)

26 September-28 September  
Gauss' Law (chapter 24)

1 October-3 October  
Electric Potential (chapter 25)

5 October-8 October  
Capacitance and Dielectrics (chapter 26)

10 October  
Review

12 October  
Test #2

15 October-17 October  
Current and Resistance (chapter 27)

19 October-22 October  
DC Circuits (chapter 28)

24 October-26 October  
Magnetic Fields (chapter 29)

29 October-31 October  
Sources of the Magnetic Field (chapter 30)

2 November  
Review

5 November  
Test #3

7 November-9 November  
Faraday's Law (chapter 31)

12 November-14 November  
Inductance (chapter 32)

16 November-19 November  
AC Circuits (chapter 33)

26 November-28 November  
Electromagnetic Waves (chapter 34)

28 November  
Review

30 November  
Test #4

3 December-7 December  
Review

12 December (10:30-12:30)  
Final Test
