Course Information

Course Description
The course provides an in-depth look into social work practice with groups, organizations, and communities, including the use of communication skills, supervision, and consultation. The course focuses on interventions at the advanced macro level of engagement, assessment and evaluation, planning for service delivery, implementing empirically based interventions, and evaluating outcomes. Advanced Generalist social work practice is anchored in and applies social work values, ethics, knowledge, and adheres to the mission of the profession focusing on the strengths, capacities, and resources of client systems in relation to the broader social environment (i.e., human behavior in the social environment content). Advanced Generalist social work practice uses a general intervention model (i.e., the helping process), based on the knowledge, skills, and values of the social work profession; and includes client engagement; assessment, planning, intervention, evaluation, termination, and follow-up. Students will learn to base evidenced supported interventions at the advanced macro level on clients, organizations, and community strengths, capacities, and resources that are designed to help clients overcome challenges and resolve deficits based on the helping process. Each of the steps in the general intervention model, and their associated activities and processes, are covered in detail in this course as they apply to large groups, organizations, and communities (i.e., direct practice on the advanced mezzo and macro levels).

Grading System

Course grades will be dependent upon completing course requirements and meeting the student learning outcomes.

The following grading scale is in use for this course:

- A = 90.00-100 points
- B = 80.00-89.99 points
- C = 70.00-79.99 points
- D = 60.00-69.99 points
- F = 0-59.99 points (Grades are not rounded up)
Teaching Strategies

Students are expected to be “active learners.” It is a basic assumption of the instructor that students will be involved (beyond the materials and lectures presented in the course) discovering, processing, and applying the course information using peer-review journal articles, researching additional information and examples on the Internet, and discussing course material and clinical experiences with their peers.

Assignment and Activity Descriptions

*Please note: Rubrics for all assignments and activities are located at the end of this syllabus.

Chapter Presentations 20%

Students will be assigned 1 chapter to create a presentation for and deliver to class in Collaborate or during the face to face class session. The students will create a ppt presentation which will include the information from the chapter and any additional information they feel pertains to the topic, then be prepared to teach the information. The students will then answer any questions the class may have.

Assessment Presentations/Paper 50%

Throughout the semester, students will create 2 presentations and write 1 paper in order to improve their ability to engage, assess, intervene, and evaluation groups, organizations, and the community. The paper will conform to the standards of the Publication Manual of the American Psychological Association, 6th Edition (2010). Each paper will be no more than 5-7 pages in length (not including cover page and references).

Plagiarism is the presentation of someone else's information as though it were your own. If you use the words or ideas of another person; or if you use material from any source—whether a book, journal, magazine, newspaper, business publication, broadcast, speech, electronic media, peer, or any other source—you must acknowledge that source. Plagiarism on the grant proposal will result in the student not receiving credit for their submission.

Assignment Submission

All assignments MUST be submitted through the Assignments link in the Blackboard site. This is for grading, documenting, and archiving purposes. Issues with technology use arise from time to time. If a technology issue does occur regarding an assignment submission, email me at anne.scaggs@angelo.edu and attach a copy of what you are trying to submit. Please contact the IT Service Center at (325) 942-2911 or go to your Technology Support tab to report the issue. This lets your faculty know you completed the assignment on time and are just having problems with the online submission feature in Blackboard. Once the problem is resolved, submit your assignment through the appropriate link. This process will document the problem and establish a timeline. Be sure to keep a backup of all work.

Student Evaluation of Faculty and Course
Students in all programs are given the opportunity to evaluate their courses and the faculty who teach them. Evaluations are most helpful when they are honest, fair, constructive, and pertinent to the class, clinical experience, or course. Faculty value student evaluations, and use student suggestions in making modifications in courses, labs and clinical experiences. Angelo State University uses the IDEA (Individual Development and Educational Assessment) system administered through Kansas State University for all course evaluations. The Office of Institutional Research and Assessment administers IDEA for the entire university, online and has established a policy whereby students can complete course evaluations free from coercion.
