**Course Delivery**

This is a face-to-face course with learning resources and supplemental materials posted in Blackboard.

**Required Texts and Materials**

**Topic Outline (Subject to change at the Professor’s discretion)**

This course will be focused on integrating an understanding of genetic research, findings and current understanding of the role genetics plays in behavior with the student’s thesis project. As such, the student will be responsible for identifying relevant peer reviewed research related to their thesis topic and orally presenting how their presented research relates to their thesis topic. Discussions, lecture and research topic will be organized into four modules that will be supplemented with Instructor provided research articles and information from the textbook.

### Journal presentation
Each week, students are expected to find a peer reviewed genetics article that is related to their thesis topic. Students will provide an oral summary of the article they chose and how it is related to their thesis topic.

### Thesis integration and presentation
Students will prepare a 15- 20 minute presentation that integrates their understanding of genetics as it relates to their thesis topic. The presentation will be organized into four sections that mirror the module organization of the course.
- Section 1: research
- Section 2: function
- Section 3: environment
- Section 4: behavior

### Communication
Faculty will respond to email and/or telephone messages within 24 hours during working hours Monday through Friday. Weekend messages may not be returned until Monday.

**Written communication via email:** All private communication will be done exclusively through your ASU email address. Check frequently for announcements and policy changes. In your emails to faculty, include the course name and number (Psychopharmacology, 6336) in the subject line.
**Virtual communication:** Office hours and/or advising may be done with the assistance of the telephone, Collaborate, Skype, etc.

**Evaluation and Grades**

Course grades will be determined as indicated in the table below.

**Grading System**

Course grades will be dependent upon completing course requirements and meeting the student learning outcomes.

The following grading scale is in use for this course:

- A = 90.00-100
- B = 80.00-89.99
- C = 70.00-79.99
- D = 60.00-69.99
- F = 0-59.99

**Teaching Strategies**

Students are expected to be “active learners.” It is a basic assumption of the instructor that students will be involved (beyond the materials and lectures presented in the course) discovering, processing, and applying the course information using peer-review journal articles, researching additional information and examples on the Internet, and discussing course material and clinical experiences with their peers. This is especially true of a graduate class.

**Late Work Policy**

Students are being scored for their weekly contribution to overall topical conversation. A deduction of 2% occurs for each unexcused absence or class session in which the student is unable/unprepared to present. Absences due to conference attendance or documented medical/family emergencies will not experience a grade reduction.
General Policies Related to This Course

All students are required to follow the policies and procedures presented in these documents:
