I. INTRODUCTION

The purpose of this introductory course in economics is to enable the student to gain an understanding and an appreciation of the nature and significance of economic activities, conditions, and institutions. An understanding of economics provides the student with a working knowledge of the economic system in which he/she is able to make his/her living. Economics also sheds light on many government's actions which affect business operations.

II. OVERALL OR GENERAL OBJECTIVES OF THE COURSE

Upon successful completion of this course, you will be able to
1. Discuss the relevance of the economic approach as it is applied to both real world situations and to economic policy making at the MACRO (national or international) level.
2. Be able to follow policy debates at the MACRO (domestic or foreign policy issues) level in an informed, enlightened way by using economics to filter the news from the political pap.
3. Identify the powerful insights the basic economic tools of economic analysis yield for solving social problems. By learning economics, you learn how to think in a way that is applicable to just about everything that you see, do, or read about.
4. Describe and predict the area in which economists agree and disagree in terms of MACRO policy debates.
5. See and foresee the relations existing among all social science fields (macroeconomics, microeconomics, psychology, sociology, anthropology, government, and history for example).
