Course Information

Student Learning Outcomes
This course is designed to familiarize the student with the processes, principles, and theories involved in Historical Geology. The student will learn how to carefully defend their thinking when answering questions and completing assignments. Learning outcomes will be evaluated by homework, quizzes, and exams. At the end of this course, the student will be able to:
1. Describe the scientific method and apply it in a geological context.
2. Describe Earth's major systems and explain how they interact.
3. Explain the plate tectonic theory and explain its relationship to earth processes, features, and landforms.
4. Explain how the Geologic Time Scale was produced, including how stratigraphic and fossil correlation is used, and how numerical ages were added.
5. Identify common rocks and minerals and interpret how they form.
6. Identify common organisms/fossils throughout geologic time and described how they changed through evolution.

**Plagiarism**

Plagiarism is a serious topic covered in ASU’s Academic Integrity policy in the Student Handbook. Plagiarism is the action or practice of taking someone else’s work, idea, etc., and passing it off as one’s own. Plagiarism is literary theft.

In your discussions and/or your papers, it is unacceptable to copy word-for-word without quotation marks and the source of the quotation. It is expected that you will summarize or paraphrase ideas giving appropriate credit to the source both in the body of your paper and the reference list. I encourage you to work together on homework assignments and to study together for exams. However, anything you turn in must be in your own words.

Papers are subject to be evaluated for originality. Resources to help you understand this policy better are available at the ASU Writing Center.
