Attendance

Students have the option of attending live in the classroom or online via Webex. Class attendance during scheduled class hours is required, whether live or remote.

Synchronous Sessions

To earn the full Synchronous Session points students must attend class (live or synchronously via Webex), then submit the synchronous session response. Directions for each response can be found on Blackboard in the particular week they are due. Response questions pertain to individual class lectures and topics.

Assignments

Assignments vary and may include cases, projects, short answers, essays, or exercises. Many of the assignments will later be incorporated into your semester project. These are individual assignments.
Final Exam
The final exam is comprehensive and covers terminology and concepts learned throughout the course. Questions will cover each week’s material with a focus on the chapter readings, required articles, required video/movies, discussion questions, and synchronous sessions.

The final exam will be online, timed, and open book/notes. However, the final exam is an individual assignment and collaboration with others while taking the exam is considered cheating. If you are found to be collaborating with other students on a test or cheating on your test, you will receive a zero for the test and might receive an F in the class and/or be dismissed from ASU.

Familiarity with the material is key so watch the synchronous sessions, complete all required readings, and complete the assignments. Well organized notes will be most helpful.

Response Time
Response to emails will normally be within 24 hours Monday through Friday. I am here because I want you to learn, so please consider me a resource. Assignments are generally graded within 10 days of the due date.

Missed/Late Work
You are free to complete your work early. Discussion questions require timely interaction with other students and will not be accepted after the due date. For all other assignments, 10% will be deducted each day an assignment is late, with the exception of university approved excuses. “Placeholder” submissions i.e. “accidentally” submitting something other than what was assigned will be considered missed assignments. Late work and missed work will not be accepted beyond five days or beyond the last day of class.

Participation/Absenteeism
Students are expected to check the course website a minimum of few times each week and read course announcements. Students are also expected to participate in a weekly or semi-weekly synchronous session with the instructor and weekly or semi-weekly discussion questions with other students. If you are unable to attend the synchronous session it will be recorded and watching the recording within the required time is considered full participation.

Required Reading/Videos

1. The required book for this class is “The Lean Startup” by Eric Reis, An entrepreneur in residence at Harvard Business School. Reis has a background in software development and his book incorporates concepts from Toyotism and Lean manufacturing.

2. Connections is a 10-episode documentary television series and 1978 book (Connections, based on the series) created, written, and presented by science historian James Burke. Burke demonstrates how various discoveries, scientific achievements, and historical world events were built from one another successively in an interconnected way to bring about particular aspects of modern technology. Burke begins each episode with a particular event or innovation in the past (usually ancient or medieval times) and traces the path from that event through a series of seemingly unrelated connections to a fundamental and essential aspect of the modern world.

3. Current articles on various course topics, primarily used as background reading for discussions and assignments.

Course Syllabus Statement on Required Use of Masks/Facial Coverings by Students in Class At Angelo State University

As a member of the Texas Tech University System, Angelo State University has adopted the mandatory Facial Covering Policy to ensure a safe and healthy classroom experience. Current research on the COVID-19 virus suggests there is a significant reduction in the potential for transmission of the virus from person to person by wearing a mask/facial covering that covers the nose and mouth areas. Therefore, in compliance with the university policy students in this class are required to wear a mask/facial covering before, during, and after class. Faculty members may also ask you to display your daily screening badge as a prerequisite to enter the classroom. You are also asked to maintain safe distancing practices to the best of your ability. For the safety of everyone, any student not appropriately wearing a mask/facial covering will be asked to leave the classroom immediately. The student will be responsible to make up any missed class content or work. Continued non-compliance with the Texas Tech University System Policy may result in disciplinary action through the Office of Student Conduct.
