Course Requirement for independent research with Ms. Caitlin Malone:

The student will be conducting research and completing an essay on alternative sources of energy and how their increasing importance may affect international security dynamics. It is expected that the student will look through the readings from SEC 6321 Energy Security (which will be made available to her), and perform additional research. The student should use the Angelo State University online library databases to her advantage: especially Academic Search Complete and JSTOR. The student will develop a specific topic and produce essay drafts which the instructor will critique, and the student will then revise and extend. The completed essay will be at least 25-30 pages in length, not including endnotes which will follow the *Chicago Manuel of Style*.
