Teaching Strategies

• Lecture, laboratory exercises, peer discussions, reflective writing, reading with a purpose, active learning strategies.

• Students are expected to be “active learners.” It is a basic assumption of the instructor that students will be involved discovering, processing, and applying the course information at a level that contributes to the learning environment.

Assignment and Activity Descriptions

Chapter Exams
There will be four exams covering selected textbook chapters and class notes. The final exam (Exam 4) will be comprehensive and will include material covered during the entire semester. Each exam will assess the student’s knowledge of information in the textbook, information covered in class, laboratories, and assigned vocabulary and concepts. Possible exam questions may include multiple choice, matching, fill-in-the-blank, short answer, and discussion. Note: Four exams are administered but the lowest score is dropped.

Labs
The purpose of these assignments is to prepare students for new content and to reinforce important concepts. Each laboratory will require the collection and analysis of data. Graphic representation of the data and discussion of the results will be submitted through Blackboard. Laboratory reports will not be accepted after the posted due date. Note: Six labs will be assigned but the lowest score is dropped.

Lecture Participation and Quizzes
Throughout the semester there will be quizzes and assignments conducted through the TopHat learning system. These activities are designed to help students engaged with the materials and to reinforce learning. The quizzes must be taken during the scheduled class time unless approved in advance.

Research Project
The purpose of this assignment is to encourage the student to do an in-depth study of one of the concepts in the course. To receive full credit for the project the student must be approved to perform a presentation during an assigned class. A full description of the project requirements will be provided to the student in a separate document.

Exam Bonus Points for Chapter Worksheets
Worksheets will be provided to help direct your reading. Not all information from each chapter will be on the test, so focus your reading by using the worksheets and the exam study sheets. I will grant up to one (1) bonus point for each page of chapter worksheet. The worksheets need to be completed in your own words and in your own handwriting. Typed documents will not be accepted unless I provide prior approval. Worksheets should be scanned or photographed and submitted through Blackboard before the beginning of the associated exam.

Attendance
Face-to-face attendance is encouraged. However, due to COVID-19 you are asked not to attend class if you fail the health screening or start to feel ill at any time during the day. All lectures will be recorded and posted to Blackboard. Exams will be administered online during class time 11:00 am to 12:15 pm on regularly scheduled class days. Failure to take the tests during this time slot will result in a score of zero. The group and individual assignments can be completed any time before the due dates.
Late Assignments
Exam and major assignment due dates are shown on the calendar/schedule or posted within Blackboard.

**Chapter Exams:** No make-ups will be given on section exams unless prior arrangements have been made and approved.

**Labs:** Laboratories must be submitted on the due date to receive full credit.

**Research Project:** The project timeline will detail due dates and how late submissions will affect the final project grade.

Basic Needs
Any student who has difficulty affording groceries or accessing sufficient food to eat every day, or who lacks a safe and stable place to live, and believes this may affect his or her performance in the course, is urged to contact the Multicultural and Student Activities Programs Center (multicultural@angelo.edu; 325-942-2729) or notify your professor.

Student Evaluation of Faculty and Course
Students in all programs are given the opportunity to evaluate their courses and the faculty who teach them. Evaluations are most helpful when they are honest, fair, constructive, and pertinent to the class, clinical experience, or course. Faculty value student evaluations, and use student suggestions in making modifications in courses, labs and clinical experiences.
Angelo State University uses the IDEA (Individual Development and Educational Assessment) system administered through Kansas State University for all course evaluations. The Office of Institutional Research and Assessment administers IDEA for the entire university, online and has established a policy whereby students can complete course evaluations free from coercion.
