Teaching Strategies
Students are expected to be “active learners.” It is a basic assumption of the instructor that students will be involved (beyond the materials and lectures presented in the course) discovering, processing, and applying the course information using peer-review journal articles, researching additional information and examples on the Internet, and discussing course material and clinical experiences with their peers.

Assignment and Activity Descriptions
Each assignment and in-class activity is designed to assess the student’s ability to apply concepts and principles of psychology being learned in any given chapter. Some activities will also in-
clude standardized measurements for the students to help them learn a bit more about themselves.

Assignment Submission
All assignments MUST be submitted through TEAMS. We will discuss the process of doing this within the first few days of class.

Late Work or Missed Assignments Policy
Acceptance of any late work must be approved by me on a case to case basis. Due dates and times for assignments are posted. Failure to submit your assignments on the assigned date will result in a late penalty deduction for each day after the posted deadline. No papers or postings will be accepted more than one week past the assigned due date.

Students in all programs are given the opportunity to evaluate their courses and the faculty who teach them. Evaluations are most helpful when they are honest, fair, constructive, and pertinent to the class, clinical experience, or course. Faculty value student evaluations, and use student suggestions in making modifications in courses, labs and clinical experiences.

Angelo State University uses the IDEA (Individual Development and Educational Assessment) system administered through Kansas State University for all course evaluations. The Office of Institutional Research and Assessment administers IDEA for the entire university, online and has established a policy whereby students can complete course evaluations free from coercion.
