Topic Outline

The topical outline is located at the end of the syllabus on the calendar.

Communication

Faculty will respond to email and/or telephone messages within 24 hours during working hours Monday through Friday. Weekend messages may not be returned until Monday.

Written communication via Blackboard: It is an expectation of this class that you use formal writing skills giving appropriate credit to the source for your ideas. Follow APA (2010) 6th edition (2nd Printing or higher only) guidelines for referencing.

Written communication via email: All private communication will be done exclusively through your ASU email address. Check frequently for announcements and policy changes.

Virtual communication: Office hours and/or advising may be done with the assistance of the telephone, Skype, Join.me, Google Hangouts, etc.

Use Good "Netiquette":

- Check the discussion frequently and respond appropriately and on subject.
- Focus on one subject per message and use pertinent subject titles.
- Capitalize words only to highlight a point or for titles. Otherwise, capitalizing is generally

viewed as SHOUTING!

- Be professional and careful with your online interaction. Proper address for faculty is by formal title such as Dr. or Ms./Mr. Jones unless invited by faculty to use a less formal approach.
- Cite all quotes, references, and sources.
- When posting a long message, it is generally considered courteous to warn readers at the beginning of the message that it is a lengthy post.
- It is extremely rude to forward someone else's messages without their permission.
- It is fine to use humor, but use it carefully. The absence of face-to-face cues can cause humor to be misinterpreted as criticism or flaming (angry, antagonistic criticism). Feel free to use emoticons such as J or :) to let others know you are being humorous. (The above "netiquette" guidelines were adapted from Arlene H. Rinald's article, The Net User Guidelines and Netiquette, Florida Atlantic University, 1994, available from Netcom.)

Grading System

Course grades will be dependent upon completing course requirements and meeting the student learning outcomes.

Late submissions are not accepted without prior approval of faculty. Students must complete all work for this course to pass this course, *even if the late submission is not accepted for a grade*. Faculty reserve the right to deduct points if late assignments are accepted past the original due date.

Teaching Strategies

Students are expected to be “active learners.” It is a basic assumption of the instructor that students will be involved (**beyond the materials and lectures presented in the course**) discovering, processing, and applying the course information using peer-review journal articles, researching additional information and examples on the Internet, and discussing course material and clinical experiences with their peers. A Discussion Board is provided in Blackboard specifically for students (“Student Water cooler”) to share websites, articles, apps, and clinical experiences relevant to the course topics. Precepted clinical experiences, clinical logs, collaborative experiences, and reflective writing are included in this course.

Assignment and Activity Descriptions

***Please note: Rubrics for all assignments and activities are located at the end of this syllabus.**

SEMESTER AND DAILY OBJECTIVES: Students will develop semester and daily objectives based upon the competencies of the National Organization of Nurse Practitioner Faculties (NONPF). The semester objectives will be submitted before the proposed daily objectives are developed. An analysis of daily objectives will be performed at least weekly. Students will submit these objectives under Submit Assignments. Three semester objectives and seven weekly submissions of daily objectives are required for this semester. Guidelines are provided in rubric format in Blackboard.

REFLECTIVE ASSIGNMENT: Reflection is an important aspect of learning about one’s self and recognizing/adapting to change. The Reflective assignment is used to facilitate this process and to assist the student in understanding and adapting to their new role as an APRN. The reflective assignment has been developed to assist the student through this transition process.

WEBINAR ASSIGNMENT: The student will view a webinar on a timely and important topic related to the FNP role. The webinar is designed to help students bridge the gap between the classroom and clinical practice to ensure professional competency. The student will post an analysis of the topic and how to apply the information to their specific future role as an APRN.

ELECTRONIC MEDICAL RECORD ASSIGNMENT: Students will complete a case study utilizing an educational Electronic Health Record (EHR) and learning platform, designed to encourage students to see the holistic nature of healthcare while becoming proficient in its technology. Students are provided with discipline-relevant critical thinking questions throughout the case study.

Clinical Expectations and Requirements

Precepted Clinical Experience

Each student will spend **250 hours** in the clinical setting with an approved preceptor (Advanced Practice Nurse, MD/DO, and a Mental Health Professional in selected sites).

The clinical practicum provides the opportunity for the student to practice advanced skills in health assessment, diagnose common acute and chronic illnesses, and suggest management/treatments under an approved clinical preceptor. Detailed information is available in Blackboard and on the Graduate Student web site:

http://www.angelo.edu/dept/nursing/student_resources/grad_info.php.

Clinical Documents

All clinical documents are located in Bb in the Clinical Forms folder. Information regarding preceptor agreements and profiles, clinical evaluations, tally sheets and the student-preceptor handbook as well as information on current clinical agencies and immunizations requirements is available on the nursing website:

http://www.angelo.edu/dept/nursing/student_resources/grad_info.php

Typhon clinical tracking system

Students will receive an email regarding access to the ASU MSN clinical tracking program NPST (Typhon). Students in clinical courses are required to input data on EVERY PATIENT seen each day spent at the clinic, up to 20 patients per day, within 48 hours of the clinical date. This data input is part of the required clinical paperwork for this course. Tutorials on using this software are available on the site once you sign in. Instructions for contacting Typhon regarding technical issues with the software are also provided. The log in page is:

<https://www2.typhongroup.net/np/index.asp?facility=7412>

Clinical Behavior Expectations

The student is expected to perform safely in the clinical setting, failure to do so may result in the student being removed from the clinical rotation. Students deemed unsafe or incompetent will fail the course and receive a course grade of "F."

The following behaviors constitute clinical failure:

- Demonstrates unsafe performance and makes questionable decisions
 - Lacks insight and understanding of own behaviors and behaviors of others
 - Needs continuous specific and detailed supervision
 - Fails any of the clinical evaluations-preceptor or faculty
 - Has difficulty adapting to new ideas and roles
 - Fails to submit required written clinical exercises/assignments
 - Falsifies clinical hours or other aspects of clinical practice
 - Violates student confidentiality agreement
-

Prior to the first clinical experience, the student will:

_____ Present each preceptor with a copy of the MSN Preceptor Orientation Packet and contact information of the course instructor (found in Blackboard under Faculty Information)

_____ Submit the signed and dated Preceptor Agreement, Preceptor CV, Preceptor Profile, Facility Agreement to the graduate secretary by the deadline indicated (if you did not use this preceptor last semester, ask them to also complete the biographical data sheets found in the Preceptor Orientation Packet).

_____ Develop and submit the **required** number of measurable Semester Objectives that you need to accomplish this semester AND the Daily Objectives for your first clinical week. Submit these under "Submit Assignments" link on Blackboard for instructor approval. Once they have been approved, share them with all preceptors.

_____ Provide the Clinical Faculty with a clinical calendar with all prearranged clinical dates and preceptor information for approval.

Each week, the student will:

- Submit three focused (proposed) daily objectives, which will help achieve the broad course objectives identified for the semester
 - Maintain a Clinical Log (one for each preceptor) of patient data, which will be signed EACH clinical day by the preceptor.
 - Maintain the clinical log system (Typhon) DAILY
 - Update and maintain clinical calendar
 - Communicate with the instructor if a student/preceptor issue arises in the clinical setting
-

Midterm, the student will:

- Obtain and submit midterm clinical evaluations from **all** preceptors with 70 hours or more and a current clinical log signed daily by Preceptors.
-

End of course, the student will:

Submit all completed forms and evaluations in Bb under the “Submit Assignments” link showing a successful completion of the clinical practicum of 250 hours (a total of 550 hours are required for the *FNP portion of the course* and 650 are required to graduate from the **MSN** program). **The student is responsible for tallying all logs before submission. Additionally, all preceptor evaluations must be signed/dated by the preceptor AND student before submitting.**

Assignment Submission

In this class, all assignments need to be submitted through the Assignments link in the Blackboard course site. This is for grading purposes. Issues with technology use arise from time to time. If a technology issue does occur regarding an assessment submission, email your instructor at their ASU email address and attach a copy of what you are trying to submit. *Please contact the IT Service Center at (325) 942-2911 or go to your Technology Support tab to report the issue.* This lets your faculty know you completed the assessment on time and are just having problems with the online submission feature in Blackboard. Once the problem is resolved, submit your assessment through the appropriate link. This process will document the problem and establish a timeline. Be sure to keep a backup of all work.

Late Work or Missed Assignments Policy

The week begins on Monday and ends on Saturday. Assignment due dates are shown on the calendar/schedule and/or posted within Blackboard. Late submissions are not accepted without prior approval of faculty. Students must complete all work for this course to pass this course, even if the late submission is not accepted for a grade. Faculty reserve the right to deduct points if late assignments are accepted past the original due date.

Grading Rubrics

Grading rubrics will be included in assignment instructions inside of the Blackboard Learning Management System.

Late submissions are not accepted without prior approval of faculty. Students must complete all work for this course to pass this course, *even if the late submission is not accepted for a grade*. Faculty reserve the right to deduct points if late assignments are accepted past the original due date.

Student Evaluation of Faculty and Course

Students in all programs are given the opportunity to evaluate their courses and the faculty who teach them. Evaluations are most helpful when they are honest, fair, constructive, and pertinent to the class, clinical experience, or course. Faculty value student evaluations, and use student suggestions in making modifications in courses, labs and clinical experiences.

Angelo State University uses the IDEA (Individual Development and Educational Assessment) system administered through Kansas State University for all course evaluations. The Office of Institutional Research and Assessment administers IDEA for the entire university, online and has established a policy whereby students can complete course evaluations free from coercion.

1. Learning to apply course material (to improve thinking, problem solving, and decisions)
2. Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course
