MGMT 4331 – Global Supply Chain Management

Course Description/Overview

“We decided to stop being so company-centric, and start being customer-centric and demand-driven. We found when you do that, some amazing things happen”
- Ralph Drayer, Chief logistics officer at Procter & Gamble

Supply chain management is the management of the flow of goods and services from the point of origin to the point of consumption. Due to intense global competition, many successful companies have realized the importance of supply chain management and become much more involved with their suppliers and their customers to meet customer demand. Global supply chain management typically involves managing procurement, operations, distribution and integration of many global organizations to efficiently and effectively meet the needs of the customers.

This course is broadly classified into four main areas: procurement, operations, distribution and integration of the global supply chain. Topics include purchasing management, supplier relationship management, ethical and sustainable sourcing, resource planning, process management, domestic and global logistics, customer relationship management, global location decisions, service response logistics, performance measurement and supply chain process integration.

**Class General Guidelines**

Your involvement in class is critical for the learning process. Learning is also closely linked to your own contribution and interaction with others. Students are expected to attend class regularly and participate in-class discussions. So please review the course materials and come prepared to participate in-class discussions, work on problems in-class, interact with other student’s in-class and with your professor, etc.

Your future careers in business will require you to exhibit professional courtesy, and to possess good ethical standards. Please be on time and treat the class as a business meeting, and be courteous and respectful of all fellow students, the professor and the educational experience (this will help you in your career). Students are expected to pay attention, and listen attentively when the professor or other students are speaking.

During class, turn off and put away all the mobile devices (cell phones, laptops, etc.) in backpacks, purse, etc. Research has established that electronic devices (cell phones, laptops, etc.) are distracting and impact students learning experience. If you are expecting an important call during class time, set the phone to vibrate mode and please talk to me before class about potential disruption. Also during class, you are expected not to work on other things that are unrelated to this course.

Grade Appeal Process

As stated in the Angelo State University Operating Policy and Procedures (OP 10.03 Student Grade Grievances), a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, has experienced inequitable evaluation procedures, or inappropriate grading practices, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the grade appeal process and the number of days allowed for completing the steps in the process, see Operating Procedure 10.03 at: https://www.angelo.edu/live/files/14196-op-1003-grade-grievance

Incomplete as a Course grade

As stated in the Angelo State University Operating Policy and Procedure (OP 10.11 Grading Procedures), the grade “I” is given when the student is unable to complete the course because of illness or personal misfortune. For undergraduates, an “I” that is not removed before the end of the next long semester automatically becomes an "F". A graduate student will be allowed one year to remove a grade of “I” before it automatically becomes an “F”. To graduate from ASU, a student must complete all “I's”.
