

Research Objectives:

The student will become familiar with the process of research through initiating an individualized research proposal. The student will conduct a literature review, develop a methodology, and construct a research proposal. The student will also become familiar with the grant process through applying for Angelo State University's single-semester faculty-mentored student grant.

Requirements:

The student will meet with the faculty member on a weekly basis. Failure to meet with faculty two times, without medical documentation, throughout the semester will result in a drop in a letter grade for the student.

The student will also be required to respond to all faculty emails within 1-4 days.

The student will write an 8-12 page research proposal.

The student will complete the Angelo State University's single-semester faculty-mentored student grant application.
