Teaching Strategies

Students are expected to be “active learners.” It is a basic assumption of the instructor that students will be involved (beyond the materials and lectures presented in the course) discovering, processing, and applying the course information using peer-review journal articles, researching additional information and examples on the Internet, and discussing course material and clinical experiences with their peers.

Assignment and Activity Descriptions

Assessment and Intervention with Children Paper 30%

Students will write a paper discussing how to assess and intervene with children (and their parents, if applicable) in one of the following age groups: 0 to 6 years of age; 7 to 12 years of age; and 13-18 years of age. This paper will address the following areas:

Complete instructions and an outline for the paper can be found on Blackboard.

Treatment Plan 40%

Students will conduct a literature review of at least 5 peer-reviewed journal articles dealing with interventions for family systems. Based on this literature review, students will create and develop a thorough treatment plan intended to be used as part of the final assignment, the Assessment and Intervention with Families paper. Treatment plans must conform to one of the
templates provided on the Blackboard LMS course site. Complete instructions, treatment plan templates, and an assignment outline can be found on Blackboard.

**Assessment and Intervention with Families Paper**

Angelo State University uses the IDEA (Individual Development and Educational Assessment) system administered through Kansas State University for all course evaluations. The Office of Institutional Research and Assessment administers IDEA for the entire university, online and has established a policy whereby students can complete course evaluations free from coercion.
