

COREY J. OWENS

Education

2005-2007	Angelo State University	San Angelo, Texas
Master of Science in Animal Science		
Supporting Concentration: Range & Wildlife Management		
Thesis Title: Juniper Consumption Does Not Cause Abortions or Reduce Neonatal Viability in Boer-cross Goats		
Graduated, May 2007		
GPA: 4.0		
2001-2005	Angelo State University	San Angelo, Texas
Bachelor of Science in Animal Science		
Minors: Range & Wildlife Management/Communication		
Graduated summa cum laude, May 2005		
GPA: 3.955		

Work Experience

2014-Present	Angelo State University	San Angelo, Texas
Senior Instructor/Research Associate Department of Agriculture		
<ul style="list-style-type: none">• Course Responsibilities<ul style="list-style-type: none">• Principles of Animal Science• Technology in Agriculture and the Sciences• Range Improvements• Senior Seminar• Research/Contractual Responsibilities<ul style="list-style-type: none">• Assist tenure-track faculty members with research projects involving range management and animal science• Supervise undergraduate and graduate research projects involving range management and animal science• Departmental recruiting at high schools, conventions, stock shows, and conferences• Supervise student recruiting organization within the department		
1988-Present	Owens Ranch	Barnhart, Texas
<ul style="list-style-type: none">• Manage and market commercial cattle, goat, and sheep operation• Range and wildlife management• Resource conservation and watershed management• Fence, windmill and general maintenance		
2007-2014	Angelo State University	San Angelo, Texas
Instructor/Research Associate Department of Agriculture		
<ul style="list-style-type: none">• Course Responsibilities		

- Principles of Animal Science
- Introduction to Applications of Microcomputers in the Sciences
- Principles of Range Management
- Range Improvements
- Senior Seminar
- Research/Contractual Responsibilities
 - Assist tenure-track faculty members with research projects involving range management and animal science
 - Supervise undergraduate and graduate research projects involving range management and animal science
 - Departmental recruiting at high schools, conventions, stock shows, and conferences
 - Supervise student recruiting organization within the department

2005-2007 Angelo State University San Angelo, Texas
Graduate Research Assistant/Teaching Assistant

- Preside over Animal Science and Range & Wildlife Management labs
- Help maintain registered cattle, sheep, and goat operation
- General range improvements
- Enhance trophy whitetail deer population

2004-2005 Natural Resources Conservation Service Ballinger, Texas
Summer Intern

- Surveyed fields for terrace construction
- Certified waterway and terrace construction
- Developed range improvement and burn plans for area ranchers
- Designed plans for farmland and rangeland conservation
- Researched and gathered data on no-till farming practices

Teaching

Angelo State University
ASCI 1319 – Principles of Animal Science

- Teach students general terms, breeds of livestock, industry, and production in the field of animal science
- Emphasize importance of domestic livestock on world economies
- Teach important husbandry techniques and general animal care and welfare

ASCI 1309 – Technology in Agriculture and the Sciences

- Introduce students to basic computer operations including email, internet, word processing, data manipulation, and presentation software

ASCI 4181 – Seminar

- Provide students with skills necessary to actively seek out and obtain a job including resume and cover letter construction, interview skills, and presentation capabilities

RWM 3331 – Principles of Range Management

- Cover information relating to issues in range management, key concepts, terminology, methods of science, and range succession

- Laboratory sections cover plant identification, plant morphology, range evaluation procedures, and models of range trend

RWM 3332 – Range Improvements

- Cover information dealing with improving rangeland health, controlling invasive species, benefit/cost ratios for range improvements, and planning strategies
- Laboratory sections emphasize hands-on experience with different range improvement techniques, range planning, and stocking rates

Angelo State University

ASCI 1341 – Principles of Animal Science lab instructor

- Primary lab instructor educating students in general terms, breeds of livestock, industry, and production in the field of animal science
- Show students production agriculture through field trips and industry tours
- Developed exams and scored tests to evaluate student progress
- Provided tutoring and assistance for students outside of lab

RWM 3331 – Principles of Range Management lab assistant

- Assisted faculty presenting plant identification, plant morphology, range evaluation procedures, and models of range trend
- Developed exams and scored tests to evaluate student progress
- Assisted in grading and administering lecture exams
- Provided tutoring and assistance for students outside of lab

RWM 3332 – Range Improvements lab assistant

- Assisted faculty emphasizing hands-on experience with different range improvement techniques, range planning, and stocking rates
- Developed exams and scored tests to evaluate student progress
- Assisted in grading exams and range improvement plans
- Provided tutoring and assistance for students outside of lab

RWM 4333 – Range Wildlife Management lab assistant

- Assisted faculty in teaching wildlife species of interest, herd management, and wildlife census observations and calculations
- Assisted in grading and administering lecture exams
- Provided tutoring and assistance for students outside of lab

Research

My research interests include biological control options for invasive species, the role of livestock in mesquite seed dispersal, cost-effective methods of slowing mesquite and prickly pear encroachment, and the role of prescribed fire in range management and invasive plant control.
