Economics Instructor and Course Developer

As an educator I provide students with a competitive edge using current events in the market economy while having students apply their experiences as well as life situations to economic concepts. Students learn through different methods but their greatest learning experience happens when you incorporate collaborative activities to engage them in the course concepts.

As a course developer, I integrate current events and up to date technology to engage learners in unique ways. For example, providing students with instructional lecture videos on economic concepts that show me “teaching” the concepts in a way they can get it!
